## **ROHS / REACH / WEEE Statement**

Dear CDI Customer,

As an authorized, franchised distributor, CDI only buys directly from our manufacturers... All of our vendors understand the compliance with the following directives.

RoHS I (2011/65/EU) (Restriction of Hazardous Substance) Will not exceed .....

- Lead (Pb) - 0.1% (1000 ppm) - Hexavalent Chromium (Cr(VI)) - 0.1% (100 ppm)
- Mercury (Hg) - 0.1% (1000 pm) - Polybrominated biphenyls (PBB) - 0.1% (100 ppm)
- Cadmium (Cd) - 0.01% (100 ppm) - Polybrominated diphenyl ethers (PBDE) - 0.1% (100 ppm)

When products are marked with "RoHS Compliant" or "Lead Free", any repackaging will be marked with a RoHS compliant sticker to keep the RoHS compliance continuity.

REACH (EC 1907/2006) (Registration, Evaluation, Authorization and Restriction of Chemicals)

- When available, SDS (Formerly known as MSDS sheets) are provided to us by our suppliers to validate compliance with the REACH directive. CDI does not manufacture any product, we only purchase finished components. The new SDS sheets have a mandatory 16-part section covering everything from physical and chemical properties, proper handling and storage and proper disposal considerations.

WEEE (Waste Electrical and Electronic Equipment)

- All product marked with (WEEE Symbol) will be disposed of through an accredited disposal company. CDI uses a disposal company that is e-Stewards, ISO 14001 and R2 certified and all certificates of destruction are kept on file. CDI uses this disposal company for all IT equipment, electronics, lighting, appliances and any damaged or scrapped product that we carry in the warehouses even if it does not have the "WEEE" symbol.
