
May 24, 2024

Dear CDI Customer,

As you are no doubt aware, the US Government has announced a 25% tariff on certain goods imported from China, scheduled to take effect on July 6, 2018. This may directly impact devices that you purchase from us, if China is the country of origin and subject to tariffs, or indirectly, if a product you purchase is assembled using devices subject to said tariffs.

CDI has assembled a list of product HTS codes that will be directly impacted by the upcoming tariffs (see Excel file attached). While we have attempted to make this list as accurate as possible, it is certainly possible that this list is incomplete, or may be made out-of-date with further changes in U.S. trade policy. There are many resources to learn more about this, including this post from the Office of the United States Trade Representative:

<https://ustr.gov/about-us/policy-offices/press-office/press-releases/2018/june/ustr-issues-tariffs-chinese-products>

To adjust our processes to this tariff and make them as transparent as possible, our goal will be to always quote and invoice this tariff on impacted devices as a line item separate from the product cost, similar to how we quote and bill for pre-paid freight. This will be straightforward when CDI is the importer of record and we are working to streamline this process with our vendors that domestically supply us components subject to tariff from a US subsidiary.

If you have any questions, please do not hesitate to contact me or your sales representative.

Sincerely,

CDI
