

## Digital TruPosition Probes

Our Digital TruPosition probes are perfect for applications that require multiple hole-location checks with a single probe. Dual LCD displays integrated directly into the handle allow these probes to accurately collect data with or without the use of a data collector. The digital TruPosition probes also allow a single probe to be used with multiple gages adding convenience and cost effectiveness.

**We currently offer eight variations of the digital handheld TruPosition probe:**

- The TP101 and TP102 have 1.00" shafts
- The TP103 and TP104 have 1.25" shafts
- The "L" suffix indicates extra shaft length

**The TP102 and TP103 models have a Mitutoyo-style SPC output port.** Each probe ships inside a carrying case, which includes a Zero-Master Bushing and certification documentation.

Model	Type	Needs	Accuracy (+/- mm)	Repeatable (+/- mm)	Range (mm)	Hole Diameter (mm)	Shaft Diameter (inches)	Shaft Length (inches)	Display	Data Port	3rd Axis Capable	Includes	Additional Requirements
TP101	Digital	Multiple Locations	0.01	0.01	3.17	23.62	1"	3.2"	Digital	No	No	Zero Master Bushing, Case and Certification	None
TP102	Digital	Multiple Locations	0.01	0.01	3.17	23.62	1"	3.2"	Digital	Yes	No	Wireless Kit, Zero Master Bushing, Case and Certification	None
TP103	Digital	Multiple Locations	0.01	0.01	6	23.62	1.25"	3.2"	Digital	Yes	No	Wireless Kit, Zero Master Bushing, Case and Certification	None
TP104	Digital	Multiple Locations	0.01	0.01	6	23.62	1.25"	3.2"	Digital	No	No	Zero Master Bushing, Case and Certification	None
