

Product Datasheet

The global certified TYKT1K8-C is a non-isolated extremely wide input smart LED driver with multiple output. 20kV surge protection level, 100khour long life and 7-year warranty provide high confidence to luminaire users. It supports not only traditional 4-in-1 control, but also D4i and DMX/RDM protocols. NFC and cable programming are both available. All around protections including digital OTP (internal and external by NTC) with auto-recovery secure 24hour non-stop operation for luminaires.

1800W, 200-480Vac Input, Triple Output Non-isolated LED Driver

■ Features

- Absolute Supply Voltage: 180~528Vac
- 20kV Built-in Surge Protector
- 97% Efficiency Max.
- Low Frequency Ripple (Broadcasting Level)
- 0.1% Minimum Analog Output Dimming
- Fast Dimming and Quick Flashing
- Low Inrush Current
- 100,000Hour Life @ Tc=75°C
- 7 Year Warranty @ Tc<=75°C
- Lumen Compensation
- +/-2% Output Current Accuracy
- 0-10V/PWM/D4i/DALI2/DMX/RDM Support
- DALI Type 6 (SimplySnap Compatible)
- Daisy Chain Control Connection
- All-Channel Sync Mode (Parallel Support)
- 1% Energy Report Accuracy
- NFC Programmability
- Glow-free Dim Off
- 24V 3W Auxiliary Power
- IP66 and IK08 Enclosure
- Safety according to UL8750, EN 61347-1, 61347-2-13, 62384

- Quick Flashing Mode

Parameter	Min.	Typ.	Max.
0-10V Dimming Models	-	-	30fps
DALI and DMX Dimming Models	-	-	44fps

- Default Dimming Curves

- 0-10V/PWM Dimming Curve (Minimum dimming level can be customized by PC software)

- DALI/D4i Dimming Curve

- DMX512/RDM Dimming Curve

Note: Both DALI and DMX dimming curves can be customized to be linear or logarithmic as default.

■ Programming

- Programmable Functions

uPowerTek LED drivers offer a range of configurable functions to meet specific lighting requirements. The Output Current, Dimming Mode, Dim Off/On Voltage Threshold, and Minimum Dimming Level can be set as basic programming functions. Users can also benefit from programming Thermal Protection, DALI/D4i Features, and DMX addressing. And Sync Mode provides possibility to control multiple channels by single DALI or DMX address.

uPowreTek Programming Software Interface

- Required Equipment

To program uPowerTek LED drivers, users will need specific equipment based on their preferred method. For NFC wireless programming, users can use a smartphone with either IOS or Android, the uPowerTek NFC Programmer, or the FEIG NFC Programmers. These tools ensure a seamless and efficient setup process, realizing precise customization of the LED driver settings.

- **DMX (RDM) Mode and D4i (DALI) Mode Connection**

- **Over Temperature Protection by NTC**

Besides the internal thermal protection, external thermal protection is also provided by TYK series. Compared with other uPowerTek drivers, TYK series only offers single connector for NTC rather than 2 connectors like NTC+ and NTC-. The suggested thermal detection circuitry is a constant current regulator and the NTC pin current is dependent on the NTC (R1) resistance thus TYK gets the current information to know the temperature of the luminaire. And the protection parameters can be set by uPowerTek programming software.

Reference	Part	Manufacturer	Description
